Homewood, AL 35209

To Whom It May Concern:

I have worked with Chris Pizzuto, The Library Furniture Guy, several times over the past few years. He has added additional shelving at Homewood Public Library, modified existing shelving for us, and most recently completely furnished our latest 3,000 square foot addition to the library. Chris is very knowledgeable, accessible, and understands budget constraints.

Ordering additional shelving was easy. I told him what I wanted, he measured, and then quoted several options. I chose the option I wanted, the order was placed, and the installation was scheduled. Chris and his installers did a great job with the installation.

I had some shelves that needed modifying, but I was not sure it could be done. I talked to Chris about the possibilities and he presented me with a workable solution. The shelves were picked up and the modifications were done very promptly. I was very pleased with the modifications and the Homewood Public Library saved a significant amount of money by modifying the shelving rather than replacing it.

Chris worked with me and our architect to furnish the new Homewood Public Library Computer Lab addition. The process from start to finish was easy and the furnishings in the new addition are beautiful.

As far as I am concerned, Chris Pizzuto is my go-to guy for any shelving or furnishings at the Homewood Public Library.

Sincerely,

Deborah Fout, Director
